inflammation demands more than symptomatic relief

Depo-Medrone for the intra-articular suppression of inflammation

“At present the most effective and long-lasting preparation for injection is methylprednisolone [Depo-Medrone] which is available at a dosage of 40 mg. per ml.”

Clinical Trials Journal (1965) 2:85.

Unlike anti-inflammatory agents which control only the symptoms of inflammation, Depo-Medrone suppresses the underlying inflammatory processes that lead to granulation, fibrosis, scarring and loss of tissue function, and in addition provides excellent symptomatic relief.

*Supplied:* 40 mg./cc. methylprednisolone acetate in 1 cc., 2 cc. and 5 cc. vials.

Some important books

CLAYTON'S ELECTROTHERAPY AND ACTINOTHERAPY
By P. M. Scott, M.C.S.P., T.E.T., T.M.M.G., School of Physiotherapy, King’s College Hospital, London
One of the essential textbooks for the student physiotherapist, this new edition has been thoroughly revised, and covers the appropriate syllabus of the Chartered Society of Physiotherapists. The book is divided into three parts: Part I, Electrotherapy-Direct and Low Frequency Currents; Part II, Electrotherapy-High Frequency Currents; Part III, Actinotherapy and Other Radiations.
5th edition 390 pages 206 illustrations 37s. 6d.

SUSPENSION THERAPY IN REHABILITATION
By M. Hollis, M.C.S.P., Principal, School of Physiotherapy, Bradford Royal Infirmary, and M. H. S. Roper, M.C.S.P., Lecturer in Physiotherapy, University of Cape Town, South Africa
An up-to-date, practical textbook for all therapists who use suspension therapy, illustrating the principles of one specialized approach to the rehabilitation of the physically disabled. Since the publication of the first edition, much new knowledge has been acquired concerning the physiology of neuromuscular mechanisms, and important changes have accordingly been made in this new edition.
2nd edition 182 pages 16 plates, 127 illustrations 35s.

REHABILITATION OF THE LOWER LIMB AMPUTEE
By W. Humm, M.S.R.G., Ministry of Health Limb Fitting Centre, Roehampton
This eminently practical book is based on remedial gymnastic training and on long experience in the rehabilitation of patients who have undergone lower-limb amputation. Its purpose is to provide guidance for therapists and others by illustrating some of the problems that face the patient and suggesting how the therapist can help overcome them. A special feature of the book is the large number of illustrations which demonstrate with clarity the techniques and methods used.
84 pages 42 illustrations 18s.

OCCUPATIONAL THERAPY IN REHABILITATION
Edited by E. M. Macdonald, M.B.E., B.Litt., T.M.A.O.T., Principal, Dorset House School of Occupational Therapy
“This is a book well and attractively presented, full of information given by people all of whom have had first-hand experience of treating the type of patients and disabilities they describe. Nothing has been taken for granted and everything has been carefully and clearly analysed.” Occupational Therapy (review of first edition).
2nd edition 372 pages, 33 illustrations 42s.

The clinical evidence is overwhelming—
**CARISOMA**

Carisoma has been clinically proven in United Kingdom trials to provide:

- **Quick effective relief in all MUSCULOSKELETAL DISORDERS**
  Ref. "Practitioner" 193.1964
  "Clin. Tr. Jnl" 1. 1964

- **Symptomatic relief in MULTIPLE SCLEROSIS**
  Ref. "Practitioner" 192.1964

- **Symptomatic relief in CEREBRAL PALSY**

- **Effective relief of MUSCLE SPASTICITY**

- **Proved of considerable help IN SPASTICITY in children**
  In children Carisoma 125 mg. helped dramatically in some cases and was of no value in others. No method has been found of forecasting those patients who will benefit.

If you would like copies of any of the clinical trials please write to:-

**WALLACE LABORATORIES**
**FOLKESTONE, KENT.**
Palaprin Forte (Aloxiprin 600mg) is unique; from basic chemistry to therapeutic role as major anti-inflammatory analgesic agent in rheumatoid arthritis. This rheumatologist's salicylate affords effective control of pain and inflammation with minimal side effects. The new formulation provides acceptable dosage flexibility in that it can be dispersed, chewed or swallowed according to patients' preference.

Palaprin Forte
the rheumatologist's salicylate
